General Instructions for Interdisciplinary Master's Degrees

To be considered for admission, any applicant seeking to pursue an interdisciplinary MA or MS degree must submit this form along with a graduate admission application form. An interdisciplinary degree program must total at least 50 credits drawn from at least two departments or programs: a major discipline of at least 20 credits and one or two minor disciplines of at least 15 credits each. The courses for the major discipline must be from a department that offers a graduate degree program defined in the EWU Graduate and Undergraduate Catalog. All interdisciplinary degrees must include a project, which is usually either a research report (601) or thesis (600) taken in the major discipline.

Applicants for an interdisciplinary degree construct a unique program of study. This is a challenging enterprise that requires careful planning. Therefore, applicants must work closely with a graduate faculty member from each department or program included in the proposal who has agreed to serve as an advisor and to help identify appropriate courses for the proposal. The courses listed must form an integrated degree program. A complete proposal requires the following:

- A brief, well-written explanation of the program
- A full listing of courses, with titles and credit values
 - No more than 12 credits may be at the 400 level
 - No more than 12 credits may be independent study (499 or 599)
- The signatures of all advisors who have agreed to serve on the applicant's committee
- The signatures of the appropriate department chairs and/or program directors
- A completed Graduate Admission Application form

Incomplete applications will not be reviewed for admission. After submission of a complete application, the vice provost for Graduate Education and Research will arrange a meeting with the advisors listed on the proposal to discuss the program. For admission, the applicant must meet the general graduate admission standards, and the vice provost must approve the interdisciplinary program proposal.
