As part of Eastern Washington University’s commitment to providing an outstanding higher education to students in the region and across the state, we are implementing a dramatically revised scholarship program. Eastern will award over 250 four year scholarships to academically eligible students, more than a tenfold increase from current four year awards. These awards are part of Eastern’s strategic effort to support high achieving students, improve time to degree completion and reduce student debt. The program aligns existing university scholarship capacity so that students in a broad range of academic fields can focus on their studies and be financially supported throughout their careers at EWU. The program underscores that Eastern is the best value in higher education in the state and includes several scholarship enhancements and new scholarships totaling over $1 million dollars per year.

**What’s New for Freshmen?**

**Honors Scholarships worth up to $14,000 each!**
